

I am writing this in hopes that I will be counted as a citizen that is against banks and other organizations calling me at home. The Indiana do not call list was developed so that people would not be harassed at home. Yes, many times it is like harrassement. I have had calls that even when I repeatedly had told them I was not interested continue to hound me, then when I became frustrated with them told me that I did not have to get mean. Our time at home is our time. We will conduct business when we find it convenient top our personnal schedule. Please, do not allow businesses to go back to using our phone numbers for solicitation. It has been very nice not to get phone calls all hours of the evening or having several messages when I get home from work.
